SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for renewal of an approved information collection. The National Marine Fisheries Services (NMFS), Alaska Region, is the sponsor of this information collection that contains American Fisheries Act (AFA) reporting requirements necessary for NMFS to manage the program and reduce salmon bycatch.

NMFS Alaska Region manages the groundfish fisheries of the Bering Sea and Aleutian Islands (BSAI) Management Area in the Exclusive Economic Zone off Alaska. The North Pacific Fishery Management Council (Council) prepared the Fishery Management Plan for Groundfish of the BSAI Management Area (FMP) under the authority of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*, and other applicable laws. Regulations implementing the FMP are at 50 CFR part 679.

The Bering Sea pollock fishery is managed under the AFA. The purpose of the AFA was to tighten U.S. ownership standards for U.S. fishing vessels under the Anti-Reflagging Act and to provide the Bering Sea pollock fleet the opportunity to conduct its fishery in a more rational manner while protecting non-AFA participants in the other fisheries. The AFA established sector allocations in the Bering Sea pollock fishery, determined eligible vessels and processors, allowed the formation of cooperatives, set limits on the participation of AFA vessels in other fisheries, and imposed special catch

weighing and monitoring requirements on AFA vessels.

This information collection contains the annual and periodic reporting requirements for AFA cooperatives. These requirements include reports about on-going fishing operations of the cooperatives and reports focused on efforts to minimize salmon bycatch in the Bering Sea pollock fishery. These reporting requirements are at 50 CFR 679.21 and 679.61.

This information is used to manage the Bering Sea pollock fishery, to evaluate the salmon bycatch management measures, and to provide the public with information about how the program operates and information about bycatch reduction under this program. This information collection provides the Council and NMFS with information about the organization and fishing operations of the AFA cooperatives, allocations to the AFA cooperatives, and the effectiveness of the Chinook salmon and chum salmon bycatch management measures. This information is necessary to ensure long-term conservation and abundance of salmon and pollock, maintain a healthy marine ecosystem, and provide maximum benefit to fishermen and communities that depend on salmon and pollock.

II. Method of Collection

There are no forms associated with this information collection. The information is usually submitted by mail or email, and in an oral presentation to the Council.
